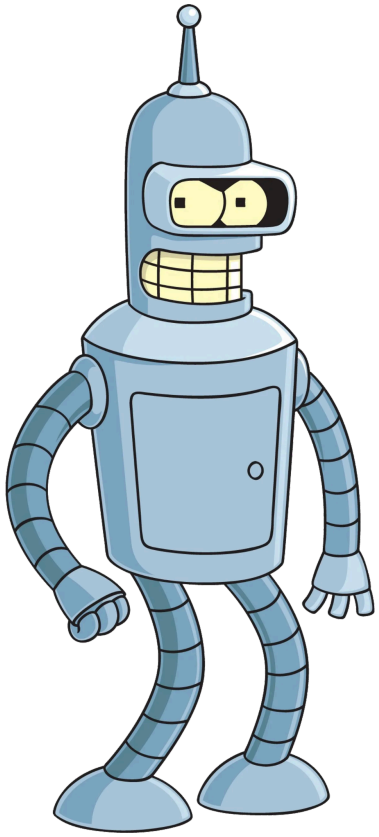
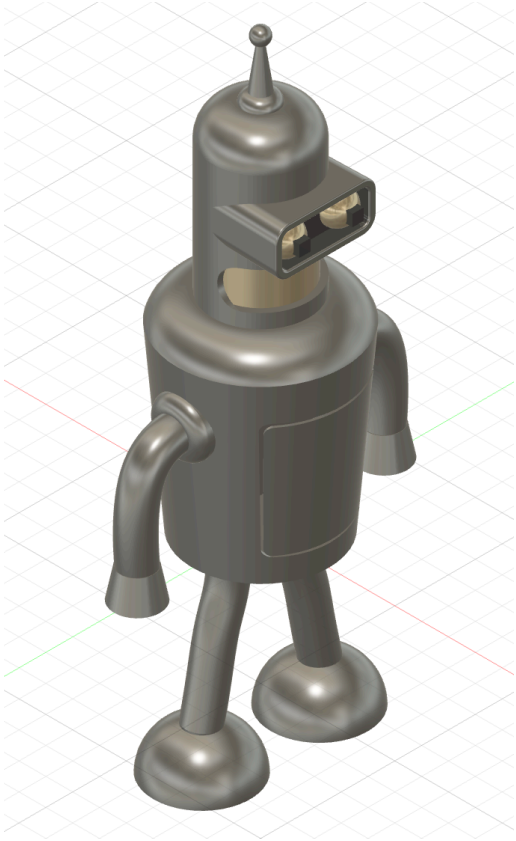
W16B: Miniature Action Figure

Instructions: Model your design based on an existing action figure or create a self portrait of yourself. Make sure to modify the design. This assignment is to implement advanced Fusion 360 features, not simply copy someone's work. Insert the requirements into your E-Portfolio.

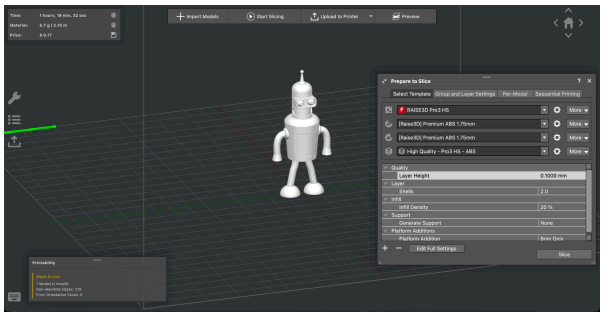
https://makerworld.com/en/models/1668723-iron-man-3dchibi?from=search#profileId-1766402

Find an inspirational model for your design, and create that design on Fusion 360. The goal is to use advanced features to model the design. The Fusion 360 model should not be a replica of the Inspirational Model but rather an improved version of the original. Students who are working on a self-portrait may use 3D Apps to model their work.

Inspirational Model	Fusion Model
	




The goal of this project is to use advanced Fusion 360 features to design a model. Make sure to use multiple advanced features and represent how they were used. Provide pictures and explain how they help you improve your design.

Advanced Modeling Features Used	Advanced Modeling Features Used
Sweeps, lofts, revolves, mirrors, etc. **Construction planes, midplanes, tangent planes.** **Parameters — majority were used as calculations rather than true configurable parameters.**	
Cost is a big part of the design process. Make sure to include images of the ideaMaker software showing that the design meets the design volume. Make sure to show how long it will take the design to print and the cost.


3D Print Cost and Time	Parameters 3x3x3 cubic inches
$0.17, 1:18
